ISTE 110: Ethics in Computing

Alvin Lin

February 13th, 2017

Presentations

Presentations will begin in the middle of March. What are elements of a good presentation?

- One that is prepared well

- One that is fluid and seamless

- One that is engaged with the audience

- One that has useful content and includes visual elements

- One where the presenter doesn't read off the slides

- The text of the presentation should merely summarize what is said

- The presenter should project their voice

Tips:

- Know your audience.

- Know your information. Start with an outline and expand into it.

- You will have 30 minutes to present.

- In 10 minutes, the audience will remember three things. You need to share what you think is relevant to the audience.

- The presentation should end with three or four points that you want the audience to take away.

- Use visual elements to emphasize what you are talking about.

- Practice your presentation and know how long it takes to go through each part.

- Make eye contact with your audience and engage with the audience. Be aware of your body language.

- Don't mumble, project your voice, keep your voice at an even pitch and speak slowly.

- You are telling a story, provide a start, middle, and end.

- Use 30pt font, visuals, 10 slides maximum.

Example Presentation Outline

Global Warming:

1. Nature vs Human Action

2. Proponents/Opponents

   - political divide
   - age divide (generational gap)

3. Science vs "Reasoning"

   - historical data
   - longitudinal studies
   - geographical changes

4. Famous Folks

   - Neil deGrasse Tyson
   - Sarah Palin
   - Bill Nye
   - Donald Trump
   - Leonardo de Caprio
   - Al Gore

5. Closing Statements

You have 10 minutes to prepare an example presentation on this.

You can find all my notes at `http://omgimanerd.tech/notes`. If you have any questions, comments, or concerns, please contact me at alvin@omgimanerd.tech
