## Impulse

Suppose you have a dead ball and a bouncy superball dropped from the same height on the surface. Which ball delivers more impulse?

Dead ball:

$$p_i = mv_0 \quad p_f = m(0) = 0$$

Superball:

$$p_i = mv_0 \quad p_f = -mv_0$$

Net impulse due to force is change in momentum  $\Delta P$ .

$$\Delta p_{dead\ ball} = 0 - mv_0 = -mv_0$$

$$\Delta p_{superball} = -mv_0 - mv_0 = -2mv_0$$
